PHP MVC

- Why framework?
- MVC Framework

Why Frameworks?

- Code and File Organization
- Utilities and Libraries
- The MVC Pattern
- Security
- Less Code & Faster Development
- Community Support
- Job Opportunities
- Performance Tools
- Suitable for Teamwork

MVC Framework

- MVC : Mode , View , Controller
- Model : Manage the data , insert, and update...
- View : Templates to present that data
- Controller : an intermediary between the Model, the View
